

586 – Customer Placing the Largest Number of Orders

PLATFORM

Platform: LeetCode

DIFFICULTY

EASY

DATE

Solved: June 5, 2026

Problem

Find all classes that have **at least 5 students** enrolled.
Return the class names

Execution Flow

- Read data from `Courses`.
- Group rows by `class`.
- Count students in each class.
- Keep only classes with count ≥ 5 .
- Return class names.

Concepts Used

1. GROUP BY

`GROUP BY class`

Groups all records belonging to the same class.

2. COUNT(*)

`COUNT(*)`

Counts the number of rows (students) in each class.

3. HAVING

`HAVING COUNT(*) >= 5`

Filters groups after aggregation.

Only classes with 5 or more students are kept.

586. Classes With at Least 5 Students Solved

Easy Topics Companies

SQL Schema Pandas Schema

Table: Courses

Column Name	Type
student	varchar
class	varchar

(student, class) is the primary key (combination of columns with unique values) for this table.
Each row of this table indicates the name of a student and the class in which they are enrolled.

Write a solution to find all the classes that have **at least five students**.
Return the result table in **any order**.
The result format is in the following example.

Example 1:

Input:
Courses table:

student	class
A	Math
B	English
C	Math
D	Biology
E	Math
F	Computer
G	Math
H	Math

Code | MySQL

```
1 # Write your MySQL query statement below
2 SELECT class
3 FROM Courses
4 GROUP BY class
5 HAVING COUNT(*) >= 5
```

Testcase | **Test Result**

Accepted Runtime: 80 ms

Case 1

Input

Courses =

student	class
A	Math
B	English
C	Math
D	Biology
E	Math
F	Computer
